

# Patients' Guide to OcuGraft

## What to expect

OcuGraft treatment period is usually 3-5 days. Depending on your condition, your doctor may choose to extend it or do a second treatment.

**Some patients will experience excessive tearing in the first 24-48 hours.**

**Continue to use eye drops and other medications as prescribed by your doctor.**

**Contact your doctor if you are uncomfortable or have any problems with OcuGraft.**

*Expect your vision to be blurry while OcuGraft is in place.*

*Plan to have a driver bring you to your appointment.*

*Avoid rubbing the eye, strong blinking or moving OcuGraft with your finger.*

*Shower only when the eye is tightly closed. Do not swim, soak your face or use a hot tub with OcuGraft in place.*

*Do not wear eye make-up while OcuGraft is in place.*

*Do not remove OcuGraft without consulting your doctor first.*
